P: +91-9782586303 | varshneya.yathartha@gmail.com | [Portfolio](#) | [GitHub](#) | [LinkedIn](#) | [Blog](#)

Summary

Accomplished Software Engineer with deep expertise in architecting and developing large-scale distributed systems optimized for high availability and low latency. Proven track record of leading teams to successfully deliver end-to-end full-stack projects in dynamic, agile environments. Proficient in backend development with Python (FastAPI), frontend development with React, and deploying scalable solutions on cloud platforms such as GCP and AWS.

Technical Skills

Languages & Frameworks: Python, FastAPI, JavaScript, TypeScript, SQL, React

Technologies & Tools: GCP, AWS, Kubernetes, Docker, MongoDB, Kafka, MySQL, DynamoDB, S3, Cloud Functions, AWS Lambda, GKE, Elasticsearch, Jenkins, Jaeger, Grafana, JMeter, Kong, GitHub, GitHub Copilot AI

Work Experience

Senior Software Engineer at Netskope, Bengaluru

Aug 2021 - Present

- Architected and engineered event-driven microservices using FastAPI, MySQL and MongoDB which resulted in 40% better average response times compared to the legacy service-based implementation and can support 20 times higher customer traffic
- Defined and implemented architectural standards by introducing an API Gateway for cross-cutting concerns (authentication, authorization, rate limiting, observability), improving average API response times by 30% and increasing developer productivity by 10%
- Designed scalable file management architecture using Pre-signed URLs, improving download times by 60% and reducing server load by 10%, significantly enhancing customer experience
- Redesigned session management architecture by moving to JWT-based sessions, eliminating session store contention and reducing request timeout-related issues by 40%
- Reduced the cost involved in running reports service by more than 80% by devising an automated system to identify rarely used reports and defer their generation until manually triggered by the user
- Designed serverless cloud-native workflows using GCP Cloud Run Functions to offload computationally intensive tasks, achieving 30% faster processing and 10% cost savings on compute infrastructure
- Reduced Mean Time to Resolution (MTTR) by 35% by improving the alerting configurations and replacing correlation based tracing with Jaeger
- Mentored junior engineers and conducted workshops on cloud technologies and distributed systems
- Built extensive unit-test coverage for all new features, resulting in 25% reduction in regression issues
- Led API performance benchmarking using JMeter, identifying and resolving bottlenecks that improved response times by ~20%
- Tools & technologies used: GCP, Python, FastAPI, React, JavaScript, MongoDB, GKE, Cloud Run Functions, GCP Cloud Storage, Cloud compute, MySQL, Kubernetes, Docker, Zookeeper, Kafka, Jaeger

Staff Engineer at Nagarro, Gurugram

Nov 2018 – Aug 2021

- Led the development of an organizational diagnostic tool that analyzed data from 500,000 weekly active users and generated insights that reduced the consultation turnaround time by 60%
- Assisted in porting multiple applications to a cloud environment, reducing operational costs by ~\$42,000 and maintaining a 99% uptime
- Led a team of 3 developers and 2 QAs to deliver multiple products with high quality earning appreciation from the clients and winning organization wide recognition
- Worked with Ops team to configure autoscaling in Kubernetes, reducing average compute resource utilization by 20%

- Reduced UI deployment package size by 25% by moving the icons to a Cloud Storage bucket from the UI codebase
- Overhauled legacy code, achieving an 11% reduction in technical debt and enhancing system performance and reliability
- Set up log analysis dashboard and alerts in Elasticsearch to proactively fix the production issues, resulting in 30% reduction in customer found defects
- Designed and implemented a synchronized login (SSO) and logout flow across multiple web applications using Redis
- Led an initiative to identify and fix security issues in the application, taking the security score above 99 in the penetration testing report and enhancing customer trust
- Performed code reviews and set up automated code analysis tools like SonarQube to improve code quality
- Tools & technologies used: Python, Flask, FastAPI, React, JavaScript, AWS, EC2, S3, DynamoDB, MySQL, Kubernetes, Docker, Kong API Gateway, Elasticsearch, Jenkins

Software Engineer at Metacube Softwares, Jaipur

Nov 2016 – Oct 2018

- Engineered robust REST APIs in Flask and applied request batching, leading to a 25% reduction in application loading time and 20% more user engagement in those pages
- Optimized MongoDB schema and queries resulting in a 25% reduction in query response times in concerned areas
- Configured SAML based SSO using Okta to enhance security and provide seamless login experience
- Tools & technologies used: Python, Flask, Angular, MongoDB, JavaScript, Docker, SSO, Okta

Software Engineer at Q3 Technologies, Jaipur

Mar 2015 – Oct 2016

- Built and maintained application that scaled to 100K daily active users while closely collaborating with cross-functional teams in the process
- Optimized algorithms of critical areas in the application reducing latency by 15%
- Partnered with the product team to identify and deliver functional enhancements that led to a 20% boost in client engagement
- Tools & technologies used: Python, Flask, JavaScript, MySQL

Software Engineer at Softworld India, Jaipur

Aug 2014 – Mar 2015

- Identified root cause and fixed issues in ordering module of ERP solution
- Enhanced reporting module of ERP solution making it more robust and stable

Awards & Certificates

- [Amazon Web Services \(AWS\) Certified Solutions Architect – Associate](#)
- [Google Cloud Platform \(GCP\) Certified Associate Cloud Engineer](#)
- [Certified IBM DB2 Academic Associate: DB2 Database and Application Fundamentals](#)
- [Received “The Brightest Mind” annual award in Nagarro](#)
- Received multiple organization wide awards and appreciation throughout

Education

B.Tech in Information Technology

Graduated 2014

Poornima Institute of Engineering and Technology, Jaipur

Final Score: 72.65%
